C&U Bearings are used by some of the world’s leading manufacturers and service providers in a wide variety of applications. Every C&U Bearing is made to exacting standards to deliver the ultimate in precision, performance, and quality.

C&U offers a full line of bearing types and styles for use in original equipment manufacturing, aftermarket replacement, and MRO operations. The C&U portfolio includes over 3,000 types of bearings in a wide range of specifications and sizes ranging from 1.5mm inner diameter to 4000mm outer diameter.

As China’s largest bearing producer, and one of the world’s top 10 bearing manufacturers, C&U utilizes the formidable production capabilities of its nine bearing manufacturing centers, 34 bearing plants, and 22 vertically integrated component plants to produce over 2.3 million bearings per day.

C&U relies on state-of-the-art manufacturing and stringent QC in order to maintain its leadership position in the bearing market. C&U Bearings are precision made in advanced manufacturing facilities that are independently certified for ISO9001 Quality Management System, QS9000/VDA6.1 Quality Management System, ISO14001 Environmental Management System and SO/TS16949: 2002 Quality Management Systems.

From its North American headquarters in Plymouth, Michigan, C&U Americas is able to offer its NAFTA customers exceptional value along with complete application engineering and customer service support.
